

## Press Release

### **Sword CTSpace Selected as Best of Showcase Semi-Finalist at IBM IOD 2010**

**San Francisco, USA – October 8, 2010** – Sword CTSpace, a global provider of document management and collaboration workflow management applications for the construction and engineering industries, has been selected as a semi-finalist for the Best of Showcase Award at the IBM Information On Demand Conference 2010 in Las Vegas, Nevada. The "Best in Show" category recognizes those IBM Business Partners who have adopted and leveraged the latest Information Management technology to demonstrate a unique and powerful Information On Demand solution.

The IBM Information On Demand Conference, one of the largest and most influential IT conferences in the world, exhibits the full range of IBM business-optimization products and solutions and offers a unique networking and business opportunity for important IT buyers and sellers. Sword CTSpace, provider of the engineering content management solution FusionEnterprise for IBM FileNet P8, was among thousands of IBM Business Partners eligible for the award. The winner and finalists will be announced during the Opening General Session on Monday, October 25th.

"Sword CTSpace are excited to attend this year's IOD conference and are honored to be selected as a semi-finalist for this prestigious award. We see this as recognition of our ground-breaking solution that leverages the power and rich capabilities for IBM FileNet P8 and extends these capabilities to deliver a vertical application specifically built for the Energy and Engineering sectors" stated James Berry - VP Sword CTSpace Americas.

Sword CTSpace has a longstanding partnership with IBM. Its 'FusionEnterprise for IBM FileNet P8' solution adds essential engineering functionality to IBM's base ECM system that enable Energy, construction and engineering companies to operate more efficiently and with less risk of errors, delays, and non-compliance. And while companies build and operate some of the largest and most complex assets in the world using their document management and collaboration workflow management software—including offshore oil rigs and refineries and nuclear plants—Sword CTSpace continues to innovate and build on its successes: it remains the only engineering content management vendor with separate yet fully interoperable on-premise and Cloud-based applications.

Conference-goers looking for further information on Sword CTSpace and their products and services can visit their exhibit in Booth 321 at IOD 2010 or check out their website at [www.sword-ctspace.com](http://www.sword-ctspace.com). Also, those looking for further incentive to attend the conference should be interested to know that two other prominent IT conventions, Cognos Forum and SPSS Directions, have been consolidated into the IOD event; and that the authors of the bestselling book "Freakonomics," Steven Levitt and Stephen Dubner, will be featured general session guest speakers on Wednesday October 27.

"We look forward to playing an active role in this world leading conference and meeting customers, partners and anyone interested in maximizing the value they bring to their organization through optimal management of capital intensive projects. We look forward to seeing you at IOD and hope you find the conference educational, informative and fun." James Berry - VP Sword CTSpace Americas."

#### **About Sword CTSpace**

Sword CTSpace provides document control, cost management and business process automation solutions to companies with capital assets to design, engineer, construct and maintain in any location in the world. More than 145,000 professionals on 13,000 projects in 56 countries benefit through improved collaboration, enhanced ability to manage schedules and risks, and improved regulatory compliance. Sword CTSpace is unique in offering both online

'software as a service' (SaaS) solutions and on premises enterprise solutions, the latter of which leverage an organization's existing investment in leading ECM platforms. Sword CTSpace is part of the Sword Group of companies. For more information, please visit [www.sword-ctspace.com](http://www.sword-ctspace.com)
